

BIG STRIKE IN SAN FRANCISCO

Fifteen Thousand Dock Workers Are Ordered Out Tomorrow.

TIES UP SHIPPING

A Conference Over the Steel Strike is Going On in Pittsburgh Today.

SETTLEMENT LIKELY

San Francisco, July 30.—The City Front Federation, comprising fourteen unions with a membership of fifteen thousand last night ordered a general strike on the San Francisco, Oakland and other bay city docks, taking effect tomorrow morning. If the strike order is obeyed by all it will mean a tie up of the shipping at this point. Business in the wholesale and manufacturing section will be seriously affected. The strike was ordered in support of the brotherhood of teamsters, locked out a week ago by the employers' association, an organization formed to fight unions.

STEEL INTERESTS CONFER

Looked at Two O'clock Today as if a Settlement Was Sure

Pittsburg, July 30.—The meeting of the Amalgamated general executive committee to consider the proposed strike settlement began this morning. There is a possibility of disagreement by the board but such a result is not likely. When the committee met it placed before President Shaffer the terms upon which the steel corporation will settle the strike and the concessions agreed to by Shaffer at Saturday's conference with the steel officials.

The understanding here at two o'clock today seemed to be that the strike is practically settled by mutual concession.

The terms of settlement most generally accepted as accurate are as follows: The Amalgamated association is to drop contention for the signing of a scale for all mills. All mills are to be "open" in the fullest sense of the term. The company is to have the right to place a nonunion man in any plant and keep him there. In addition to the plants covered by the expired scale it is to be signed to the following: W. Dewees Wood of McKeesport, Painter, Lindsay, and McCutcheon, and Clark Mills of Pittsburg and Monessen plants of the American Steel Hoop company. The question of making the Wellsville sheet plant and the Monessen tin plate plant directly covered by the scale is to be settled by the conferees. The Amalgamated association is to have the privilege of organizing the men in any of the plants. The executive committee of the Amalgamated association met at headquarters at 10 o'clock this morning to ratify the provisional terms outlined by the New York conference. An informal meeting of conferees to represent the three operating companies in the joint conference was held at the same time. Manufacturers' conferees of the last meeting will be in readiness to meet the Amalgamated men, possibly at the Amalgamated headquarters in the Bissell Block in the afternoon to sign the scales. President Shaffer held a long conference with Secretary Bishop and M. M. Garland. At the close of the meeting none of the parties would talk. Whatever settlement terms are predicted it still remains a fact that the whole affair may be upset at this afternoon's meeting. The chances of a disturbance, however, are thought slight.

The Salvation army worked overtime today. Taking advantage of the great crowds in the city they held street meetings this morning and surrounded themselves with people who were waiting for the circus parade.

BALDWIN SETS SAIL FOR NORTH POLE FIVE YEARS' ARCTIC TRIP BEGINS

Three Ships Provisioned for a Long Journey Bear the Venturesome Yankees to the Arctic.

Tromsø, Norway, July 30.—Evelyn B. Baldwin, at the head of what is said by experts to be the best organized and equipped expedition that ever entered the arctic, has sailed on the voyage in which she hopes to win for the American flag the distinction of being the first to be unfurled at the north pole.

The explorer expressed confidence that the American energy and money enlisted in the enterprise and the novel methods brought to its aid would bring success to the efforts of himself and his associates.

Three vessels, well provisioned, a large company of scientists and everything in the way of equipment that experience could suggest make up the expedition, and all are now on the seas northward bound.

Mr. Baldwin, on the steamer America, the flagship, will go first to Archangel, where he will take on 425 dogs.

SENATOR SPOONER VISITS MILWAUKEE

He Refuses to Discuss Political Matters During His Vacation—In the Best of Health.

Milwaukee, July 30.—Senator John C. Spooner was in Milwaukee yesterday for a short stay, and his presence gave rise to all sorts of rumors in connection with the new organization of the stalwarts. As a matter of fact the senator's visit was primarily on private matters, but this did not prevent him from paying a visit to his colleague Senator Quarles with whom he dined at the club.

Senator Spooner would say nothing on the political situation, stating that he had just come home from the White Mountains, where he and his family have been staying to transact some private business. When the senator made his appearance in the past he was surrounded by friends and politicians, but his stay was of the briefest, and it was noticed that he let the others do the most of the talking.

The senator is brown as a berry and is in the best of health. He said he was enjoying his vacation, and giving no thought to politics, just resting up and leaving all troublesome matters for the future.

CYCLONE WHISKS PART OF A TRAIN

Four Cars Picked Up and Set Down Twenty Yards From Track Near Hamlin, Kas., on Sunday.

Wichita, Kan., July 30.—Four cars from freight train No. 514 on the Rock Island road were blown away by a cyclone Sunday night. The news of this peculiar wreck was brought here today by Conductor W. A. Burns. The cars were picked from the center of the train and set down twenty yards from the track. There were about twenty more cars on the train but they were not even derailed.

The front end of the train went on not knowing that the cyclone had damaged it until a brakeman in going over the cars made the discovery. The train was then stopped and run back to the scene of the wreck. No rails were even torn from the track. The cyclone failed to do any damage elsewhere in Hamlin.

The wreck was officially reported to the Rock Island officials today. They say nothing similar ever happened in Kansas. Last fall a cyclone derailed a whole passenger train on the Frisco near here. In last night's wreck no one was hurt.

BIG DIVIDEND BY NEW YORK BANK

The First National Distributes a 600 Per Cent Dividend, Amounting to About \$3,000,000.

New York, July 30.—A cash dividend variously estimated at from \$3,000,000 to \$5,000,000, has been paid by the First National bank. Officers of that institution while they admit the payment of a large sum to the stockholders, will not state the amount or the reason for making so generous a present. Vice President Hines said that the dividend was declared the same day that the capital stock was increased. Regular dividends reaching 100 per cent a year have been paid for some time. Today's announcement, however, means a dividend of 600 per cent on the old capitalization.

The First National owns a great many securities upon which a large margin of profit has accumulated in the last two years.

In a statement of the condition of the bank July 24, made to the comptroller of the currency, the amount of "other stocks and bonds" shows investments aggregating nearly \$23,000,000. The bank owns more securities, it is believed, than any other financial institution in the country.

Judgment of foreclosure was entered in the circuit court today in favor of William B. Canfield against Melvin Cady and others. Clyde White of Edgerton was among the visitors whom the circus attracted to this city today.

PETER L. MYERS TAKES A BRIDE; MARRIED MISS GLOVER AT BUFFALO

The Young People Could Not Stand the Probation of One Year's Waiting Imposed by the Bride's Parents—Romantic Story of the Courtship.

A romantic wedding full of interest to many people, occurred at Buffalo, N. Y., last Friday night when Miss Florence Glover, of Hudson, Wis., became the happy wife of Peter L. Myers, of this city. The wedding was a quiet affair and was the culmination of as pretty a love story as is ever met with in real life.

Last winter Mr. Myers being in poor health, went to Hudson and entered the sanitarium at that city. While there he met Miss Florence Glover, daughter of Hon. and Mrs. John Glover and the meeting was the beginning of the pretty romance. It was a case of mutual love at first sight and the courtship which was idyllic. When Mr. Myers returned home in June the arrangements had been made that the wedding should take place at the bride's home on August twenty-sixth, although Miss Glover's parents were opposed to so brief an engagement.

As the days passed by the parents became more opposed to the speedy marriage and finally persuaded the young people to agree to postpone the wedding for a year at least. Miss Glover went east to visit an aunt at Buffalo and Mr. Myers returned to Hudson to the sanitarium. Evidently, however, the young people found the year's separation anything but an alluring prospect and decided to take matters into their own hands.

The first part of last week Mr. Myers was in the city for a few hours on his way east. At Chicago he was met by his sister, Miss Katie Myers, who accompanied him to Buffalo and was present at the wedding.

Before Mr. Myers went to Buffalo the plan had been to be married tomorrow, the thirty-first of the month, but, on the arrival of himself and sister in Buffalo the plan was changed. An effort has been made to keep the announcement of the wedding from being made public for a few days.

Mr. Myers mother and his brother, John H. Myers, when asked about the wedding, said that they had nothing at all to say although it was known that they had received telegrams announcing the happy event. The truth leaked out, however, as such news always will, last evening.

SUDDEN DEATH OF GEO. H. YENOWINE

Well Known Milwaukee Newspaper Man Passes Away After an Illness of a Few Days.

Milwaukee, Wis., July 30.—George H. Yenowine, well known in Wisconsin newspaper circles, died suddenly last night of Bright's disease, at the age of 44 years. He came to Milwaukee from Louisville about twenty years ago, and became city editor of the Evening Wisconsin, and later he established Yenowine's News, a Sunday paper, devoted to the social interests of Milwaukee. A few years ago he disposed of his interests in that publication and returned to Kentucky, where he engaged in agriculture in addition to conducting the Sunday features in the Courier-Journal, but came to Milwaukee again about a year ago to take a position on the Evening Wisconsin. He was for a year or two manager of Eugene Field's lecture tours, and when the Chicago poet died Yenowine was at Mr. Field's home in Lake View.

ICE CREAM PRICES RAISED

Long Drought Responsible for Many Inconveniences at Madison. Madison, Wis., July 30.—In addition to raising the price of milk from 5 cents a quart to 6 cents, the long drought is also responsible for a raise in the price of ice cream from 75 cents a gallon to \$1. The new rate will go into effect on August 1. Owing to short pastures resulting from the long dry spell there has been a drop of over 60 per cent in the milk supply here. One local creamery that had been receiving 10,000 pounds daily is now receiving only 4,000. Even at the university farm, where conditions are nearly as perfect as it is possible for man to make them, the supply has fallen off 50 per cent.

MADISON TO HAVE A CARNIVAL

Council Grants License to the Forty Thousand Club. Madison, Wis., July 30.—By a vote of 12 to 1 the common council late last night adopted resolutions granting licenses to the Forty Thousand club for a street fair and carnival. No shows but those endorsed by the carnival are to be licensed. The adoption of the carnival resolutions was against the petition of the Woman's club and many prominent citizens.

Waterworks for Evansville

Evansville, Wis., July 30.—A special election will be held here July 31 to decide the question whether or not the city will grant to A. L. Brown of Chicago a franchise to put in a system of water works. Mr. Brown proposes to buy the electric light plant and run it in connection with the water works, and when complete turn the entire plant over to the city at a cost of \$51,000. Evansville was started about sixty years ago and has never had a system of water works.

IRISH EXPELLED FROM COMMONS

William Redmond and Patrick O'Brien Suspended for Engaging in Obstructive Tactics.

London, July 30.—There was wild uproar in the house of commons between 1 and 2 o'clock this morning at the conclusion of the debate on the taxation of agricultural property. The conservatives interrupted Mr. Walton, liberal, with cries of "Divide!"

William Redmond, on a point of order, called the attention of the speaker to the interruption, but the speaker ruled that the point was not well taken. Mr. Walton resumed but quite inaudibly, owing to the persistent cries of divide!

Mr. Redmond shouted: Police! Police!

The speaker said that his expression was disorderly.

Mr. Redmond retorted: Why don't you keep order?

The speaker directed him to leave the house and named him.

Mr. Balfour, the government leader, moved Mr. Redmond's suspension, and this was carried by a vote of 303 to 71.

Patrick O'Brien persisted in the same point of order and was in turn named and suspended. The bill was adopted.

PROF. CARY GIVEN SWILER'S PLACE

Milwaukee Normal School Teacher Elected Superintendent of State School for Deaf at Delavan.

Milwaukee, July 30.—Prof. C. P. Cary, of the Milwaukee Normal school, was last night elected superintendent of the state school for the deaf at Delavan by the board of control at Madison. The salary is \$2,000 and maintenance for himself and family.

C. P. Cary was born in Ohio and has been in educational work nearly all of his life. He is a graduate of the Ohio Central Normal school as well as of the university of Chicago, and was principal of the schools in Ohio and Kansas. He was afterward superintendent of the schools of Brown county, Kansas, and was superintendent of the schools and principal of the high school of Fairbury, Neb. In 1893 he was chosen professor of pedagogy and superintendent of the model schools and practice teaching in the Milwaukee State Normal School. Mr. Cary's specialty is psychology and pedagogy and he is personally acquainted with many of the prominent educators of the United States. The position, it is said, was not sought by Mr. Cary and came as a voluntary offering from the members of the state board of control.

DEAF MUTES ELECT OFFICERS

William O'Neill of LaCrosse President for Coming Year

La Crosse, Wis., July 30.—The ninth annual convention of deaf mutes today was a carnival of inspiration. At the opening this morning prayer was followed by an address by President Robinson, who told the story of his life, and said that deaf mutes were growing influential and have something to live for. The afternoon session was also devoted largely to speeches after which the reports of the officers were read. R. Wallace Williams of West Salem closed the session with a twenty-fifth anniversary speech.

Officers for the ensuing three years were elected as follows: President, William O'Neill of LaCrosse; first vice president, Alfred Cehman of North Richmond; second vice president, Walter Redmond, Neillsville; secretary, S. W. Williams of West Salem; treasurer, Thomas Hagerty, of Delavan.

Quite a delegation of the golf players from the Mississippi Golf club will go to Milwaukee this week to take part in the tournament of the Milwaukee Country club. At least five will enter the qualifying round for the several cups.

TELEPHONE GIRL WINS A BIG PRIZE; DRAWS A \$40,000 TRACT AT EL RENO

Luck of Miss Mattie Beals of Wichita—"Bummed" Her Way to El Reno and Registered Just for Fun—She Has Offers of Marriage.

El Reno, O. T. July 30.—One thousand choice tracts of land, 160 acres in each, were given away here by the government yesterday. This is the first allotment of the 13,000 claims to be distributed, and it is expected that the work will be completed by Thursday evening.

The two most valuable prizes were won by James R. Wood of Weatherford, O. T., and Miss Mattie H. Beals of Wichita, an attaché of the telephone exchange there. These persons drew first choice in the Lawton district, and can select quarter sections of land adjoining the town site worth \$40,000 each.

When their descriptions were read it was found that they were exactly of the same height. Miss Beals is 23 years of age, and the crowd immediately set up the cry: "They must get married!"

The eighteen-year-old winner of a claim was Minerva McClintock, aged 25 years, of Oklahoma City. She was married yesterday, thus forfeiting her right to a claim. This deprives her of the privilege of selecting a quarter section of land

DEFIANCE OF GERMAN FLAG

Outrage on the Kaiser's Emblem by Colombian Authorities.

MAY CAUSE A STIR

German Ship Detained and a Passenger Forcibly Carried Off to Captivity.

UGLY LOOKING AFFAIR

New York, July 30.—An outrage on the German flag by the authorities of Colombia is reported by Captain Lowe of the Hamburg-American liner Alleghany, which arrived here today from the South American republic. The captain and passengers declare that they will make representations to the Kaiser's government urging that redress be sought of the belligerent little nation. The trouble, which included the illegal detention of the Alleghany in the harbor of Savannah for twelve hours, arose over the arrest of Abel Murrillo, a passenger, who is said to be the secretary of General Uribe Uribe, the revolutionary leader. Murrillo was dragged from the ship at Cartagena despite his claim that he was under the protection of the German flag, and was taken ashore protesting vigorously. Dramatic scenes marked the arrest of Murrillo, the most notable of which was the tearing from his body by the Colombian officers of a German flag which he had wound around him. It is charged by witnesses that the men making the seizure called the Kaiser's emblem "a dirty rag" and otherwise treated it with contempt. Murrillo went to Colombia, it is reported, with a passport given by the representative of the Colombian government at Washington, with the understanding that his mission was a peaceful one. When the vessel arrived at Cartagena it was ordered detained by the authorities there. The captain protested that he was sailing under the German flag and that no official of Colombia had a right to stop the vessel for any purpose whatever. This protest was unheeded, however, and search was made for Murrillo, who was found on deck. He declared that he would not be arrested, and running to one of the ship's masts, he seized the German flag which was lying there and wrapped it about him. Then he stood forward and cried out: "I am under the protection of the German flag and you have no right to arrest me." According to the passengers on the Alleghany the Colombian officers, notwithstanding the protest, seized the man and dragged him from the vessel.

HEAVY RAINS HELP WISCONSIN CROPS

Tobacco Has Been Seriously Damaged, But the Fruit and Potato Yield Will Be Very Good.

The heavy rain which was general in all parts of the state Sunday and early yesterday morning was of inestimable benefit to farmers, and practically saved the corn crop from total destruction. In the southern counties corn on lowlands is still in a satisfactory condition, and with the abundant moisture will take rapid growth. On the uplands and sandy soil, however, the damage from drought and heat has been so great that it is doubtful whether the rains have come in time to save more than a part of the crops.

Reports on oats and barley are that these crops have ripened rapidly and that a large acreage was harvested last week. In the southern counties some threshing has been done and the yield is fair, although oats are generally of light weight. So far as the heat and drought are concerned these crops are not seriously affected.

The tobacco crop has been damaged seriously by the lack of rain. In some localities, the crops will be almost a total failure. In parts of Vernon county and in limited areas elsewhere, where the rainfall was more abundant, a fair yield is expected.

The rains in the central and northern sections interfered with harvesting the hay crop and considerable loss was the result. The crop, however, is generally heavy and of excellent quality, except in southern counties. Fruit and potatoes are reported in good condition and the rain is expected to develop the crop to its usual standard.

At last here is a break in the severe dry weather conditions in Wisconsin and good rains have fallen in many portions of the state. World also comes from the west that rain has greatly relieved the situation and there are yet hopes of a good corn crop. Feed will be scarce and every effort should be made to provide as much roughage as possible that the live stock may be carried through instead of being sold, especially the young growing stock.

There is yet time to secure a fair crop of millet, sorghum, turnips and rape, and rye sown soon will make good fall and spring pasture. Sorghum will yet produce, with favorable conditions, several tons of older per acre. Ground should be plowed and well fitted before sowing. Early amber is the best variety to sow, and a half bushel per acre

ANNUAL REUNION OF 5TH WISCONSIN

At the annual reunion of the 5th Wisconsin, which was held last week in Milwaukee, of the one thousand men that left this state for the front in 1861, only about sixty were present at the reunion.

At the reunion held in Milwaukee in 1889 about 200 were present. Every year the number has grown less. There are still about 250 members of the regiment alive, but they are scattered all over the United States.

Of the regimental band, twenty-two strong when they left for the front, but three were present at Milwaukee, they being James Landon of Janesville, Robert Brand of Oshkosh and George Winn of Beldit.

Colonel Amasa Cobb of Lincoln, Neb., was present at the reunion and addressed those assembled. He received a hearty welcome from the members of his old regiment and had an enjoyable time recalling the stirring events the regiment took part in.

During the fifteen months the regiment was in service they took part in forty-five battles and skirmishes. At St. Mary's heights the 5th was in the front of the fight and lost about 160 men in ten minutes. The regiment was mustered in April 25, 1861, at Camp Randall, Madison, and started immediately for the front.

From the time they arrived in the south until they were mustered out they were in the thickest of the fight. James and Mayhew Landon of this city were both members of the band and were with the regiment from start to finish. They are now both well advanced in years but are still hale and hearty and have a clear recollection of all that transpired during their fifteen months of service.

ORDER TO RURAL MAIL CARRIERS

The full text of the postmaster general's order prohibiting rural free delivery carriers acting as agents for express companies or other people, is now available. This is the order which was called out by the fact that certain of the carriers were acting as agents for wholesale liquor houses in large cities. It says: "Hereafter rural letter carriers shall not act as agent, salesman or solicitors for express companies, letter box manufacturers, wholesale houses, corporations or firms, nor engage in any business or avocation which would interfere with the proper performance of their official duties. They may act as news agents, sell newspapers, or periodicals on their own account, or accept and collect subscriptions for the same. When carriers receive newspapers or periodicals by express or by other means outside the mails, to be sold or delivered on their routes, they, as news agents, will be required to pay postage on such matter at the second class rate of postage, (one cent per pound) except in the case of county papers which are mailed free to subscribers residing in the county in which they are published. This order is not intended to prohibit carriers from performing various private commissions for the accommodation of patrons on their routes, so long as it does not interfere with the regular and prompt performance of their duties."

ORFORDVILLE

Orfordville, Wis., July 30.—As an aftermath of the fire Wednesday night that threatened to wipe out the entire village those through whose heroic efforts the calamity was averted, were invited to come and bring their friends to the Star Opera House on Friday evening where ice cream and wafers were served to all present. About one hundred and fifty accepted the invitation and spent a pleasant hour in drawing comparisons between the two evenings. The refreshments were furnished and served by Oscar Roen. Albert Hyerdahl, Dr. J. W. Keithley, Allen and Charles Taylor whose property lay in the closest proximity to the fire and which for more than an hour seemed doomed to certain destruction and which was saved only by efforts that would have been a credit to the best organized fire company, with the best of appliances for extinguishing fires. These gentlemen desired to express their appreciation of the work done and so chose this method.

Messrs. Bud Kelley and Henry Knudson left for Grand Forks, N. Dakota on Monday where they expect to remain for some time.

Forty-three tickets were sold from here for the Dells Sunday.

Pere Marquette Route.

Thousands of Wisconsin people are arranging to visit the Pan-American Exposition at Buffalo this summer. The Pere Marquette route, via Milwaukee and Detroit, will be the favorite with many who know of its comfort and attractive features. It is a relief to the traveler to change from the dusty cars to a comfortable steamer for a few hours. Round trip tickets to Buffalo via Milwaukee at excursion rates, with stop-over privileges. Ask your agent or write N. W. Jameson, T. P. A. 91 Wisconsin street, Milwaukee, Wis., for particulars.

Going to the "Pan."

A number of early visitors to the Pan-American Exposition at Buffalo have returned. Everything is now complete and the show is reported to be finer (if not so large) than the World's Fair. A great many have gone via Milwaukee and the new route, the Pere Marquette lake and rail to Detroit. A card of inquiry addressed to H. W. Jameson, T. P. A., Milwaukee, will bring you any information you wish concerning rates, time, etc.

Colorado Feud Ends Fatally.

Trinidad, Col., July 30.—Phil McWilliams, a ranchman living a few miles below town, shot and killed Salvadore Pareces and his son, Charles Pareces. In the fight that occurred at least a dozen or more shots were exchanged, the Pareces shooting McWilliams' horse from under him. The shooting is the outcome of an old feud.

Two Men Found Dead.

Springfield, Mo., July 30.—The decomposed bodies of two men were found in a cornfield near Elkhart by Miss Buck, daughter of Abe Buck, a farmer near town. A letter on one was addressed to A. B. Abrams, St. Louis. The bodies had no marks of violence, and the cause of death is unknown.

Fatal Fight at Fremont, Ohio.

McKinley Attends a Funeral.

Canton, O., July 30.—President McKinley attended the funeral services of Leopold Biechle, his old neighbor and friend, whose death caused the postponement of the complimentary concert arranged for the McKinley lawn.

Miss Hene Tanberg is home from a month's visit with friends in Monroe.

New Parlor Cars.

Two parlor cars, named respectively "Janesville" and "Beloit," "spick and span new" from the builders have been received from the Chicago, Milwaukee & St. Paul Railway and will be placed at once in the service for which they were expressly built—between Chicago, Janesville and Madison.

The new cars have an interior finish of mahogany and are seventy-five feet in length. The exterior is the St. Paul standard color. In addition to the usual parlor, seating thirty people, each has a large observation room, a state room and buffet. The latter, besides being fitted for ordinary buffet service, is equipped with a broiler, from which steaks, chops, etc., can be served.

The equipment in service on the St. Paul road to and from Southern Wisconsin points has received many favorable comments. The new cars—the handsomest so far built—will complete the finest day trains leaving Chicago.

ONE CERTAINTY

Some Janesville People Fully Realize It Now

When the back aches from kidney ills, when urinary troubles annoy you, there's a certain way to find relief—a sure way to be cured. Doan's Kidney Pills will do it. Janesville people endorse this claim. Mr. H. W. Rodgers, carpenter, of 210 South Main street, says:—"My wife had kidney complaint and rheumatism for five years, suffering a great deal from pain across the loins. Doan's Kidney Pills, sold by the People's Drug Co., brought much longer for and gratifying results. At first there was no visible change and she came to the conclusion that they were like all other remedies she had tried, but finally the aching and the distress in the small of her back disappeared."

WISCONSIN WEATHER FORECAST
Generally fair tonight and Wednesday.

PARTY LOYALTY.

It is well for the republican party in the state that it has connected with it a strong, conservative element, that cares more for party success than for personal ambitions.

This element is called "stalwart," a name that is full of significance, and that is destined to stand out prominently in party councils and that will have much to do with saving the party from self-destruction.

The state of Wisconsin is a conservative state. Unlike Kansas and Nebraska, and some of the far western states, it has never been safe for political parties to drift very far from their moorings or attempt measures that were not time tried and thoroughly tested.

Wisconsin democracy learned to its sorrow that party principles could not be sacrificed to a phantom as plausible even as free silver.

When Bryanism was the most popular and when a large army of voters was flocking to the new standard, Wisconsin stood firm for honesty and sound money. Thousands of life long democrats broke away from party associations, not through lack of party loyalty but because of disgust for fanaticism and the dangers attendant.

The republican party of the state is rent with internal strife at the present time, not because of free silver or any issue of national import, but because of the personal ambition of a governor and a little coterie of admirers.

This faction, posing as reformers, does not represent the party in the state, any more than did the free silver wing of democracy, represent the democratic party. It is a faction exploiting theories for popular effect and for personal gain. The primary election law was its pet theory, to which every energy was bent, and for which every resource was exhausted.

With defeat of the pet measure came disappointment and the welfare of the party was sacrificed to gratify personal spite. This thin gauze of reform was speedily brushed aside, and the party given to understand that harmony could only be secured by bowing meekly to the will of a dictator whose leadership was already recognized as erratic and unsafe.

It is not at all strange that conservative republicans throughout the state recognized the danger, and placing party loyalty in advance of personal ambition, said, an effort shall be made to save the party from self-destruction.

The conservative wing of the republican party is not impulsive. It exhausted every effort to gain an audience with the man it elevated to office, and submitted patiently to slight and insult until patience ceased to be a virtue.

The party will survive because of its loyal constituency, and it will also be redeemed from populist reform.

Whether any of our milk dealers are guilty of selling impure milk, the babies and invalids of our city should have the protection of frequent inspections. These are the words of a prominent local physician, and probably express the feeling of a majority of our intelligent citizens. There is the other side to this question. Our honest milk dealers deserve the protection of inspection which would save from condemnation those whose milk comes up to the standard demanded by law. There is no food so universally used or so wholesome, and nutritious as milk, and because it is one of the best mediums for bacteria culture, it should be inspected and graded with the greatest care, lest some contagious germ start an epidemic among customers of some milk dealer. Typhoid fever is one of the worst diseases which can be transmitted by milk quite as well as by impure drinking water. This fact can be illustrated by calling to mind one dealer in Chicago, eighty-five per cent of whose customers suffered more or less from typhoid fever. On investigating the case it was found that the cans were washed with water from an old shallow well, instead of being scalded as all milk cans should be. Such carelessness and lack of cleanliness is criminal and should be punished. We have no means of knowing the condition of the milk of the local dealers as

a whole, but we do know that some of the milk which should contain three per cent, or over of butter fat, only contains one and four-tenths per cent, or less than one-half that required by law. Again, some milk dealers, in warm weather, when the milk is apt to sour, will prevent that souring by the use of formalin or boracic acid or other preservatives, some of which are rank poisons, others of which are harmless except that they will prevent digestion of the milk for the same reason that they prevent souring. The addition of water or the subtraction of cream are harmless. Nevertheless, it is adulteration in the eyes of the law and should always be punished just as severely as harmful adulteration. Let Janesville's health officer make arrangements to have our food supply kept free from adulterations of all kinds.

The Religious Conventions.

The Christian Endeavor convention with its 40,000 delegates; the Epworth league with its 30,000 delegates, and the Baptist Young people with 10,000, besides the Universalists and several smaller conventions, calls attention to the fact that something over 80,000 young people have been traveling thousands of miles to meet together, and for what purpose? Though of different names they all possess the same object and try to reach it by practically the same means. Their power and influence in the world certainly will be felt for good, if their efforts are continuous and systematic. Joined by the Y. M. C. A. these young people can so unite their efforts along the line of good citizenship as to make them a factor to be considered in politics.

The Whittier Monument.

The memorial to Margaret Fuller has been unveiled at Point o' Woods, Long Island, and now comes the announcement that a monument is proposed for the home of Whittier at Amesbury, Mass. To those who have read the works of this New England poet, he must appear as having an instinctive insight into nature and at the same time possessing ability to picture nature to the common people as few men have been able. Whittier made every reader feel a friendliness and an interest in the White Mountains, or, for that matter, any region about which he wrote, because of his wonderful ability in word painting. His works will keep his name fresh in our memories for all time, but it is especially fitting to reserve a plot of ground so frequented as a home, consecrated to these great singers who have filled the world so full of music.

One of the governor's official henchmen was at Stoughton the other day, searching for a Norwegian candidate for insurance commissioner. It will require several offices to get the Norwegians in line, to say nothing about the Germans. The campaign of reform seems to be progressing.

George D. Herron is now a full fledged socialist. The transition from free love and loose morality was not startling. He will find no trouble in securing a sympathetic audience and will doubtless become a rival of Debs as a leader.

The truth of one of the most atrocious massacres during the Boxer war is coming to light. It places the Russian general, Gribsky, in a most unfavorable light. The Chinese may well hate civilization if this atrocity is one of the concomitants.

JOLLY JOBBERNOWLS RIDE THE MERRY GO ROUND

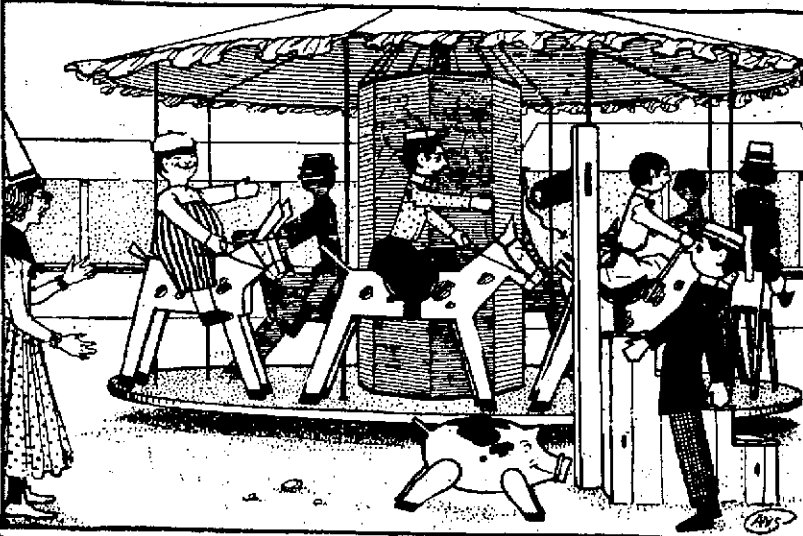

Copyright, 1899, by Caroline Wetherell.

Because they'd worked for her so well, kind Mother Goose agreed That of a merry holiday the Jobbernows had need. She baked her very nicest cakes, she made some luscious pies, And these and more she packed within a box of ample size. They started for a nearby beach, all sober, staid and neat, All packed within a funny cart drawn by a donkey fleet. Because he pleaded so to drive, Pat held the reins awhile, But naughty Neddy would not budge, which made the people smile.

With Mother Goose in charge of Ned, he briskly bobbed along, And as they rode the party sang a jerky little song. When they had come to Seashell beach, the wildest fun began. They dug the sand and gayly bathed, nor cared how they might tan. A hermit crab whom they annoyed caught Ole by the toe And clung to it in spite of shakes and Ole's shrieks of woe. The pig of clams had quite a feast. Said Hans, "A clambake's rare!" And so upon a fire they built they baked some clams with care.

Carousel riding was the treat reserved until the last, And Mother Goose with pride surveyed their figures rolling past. For rings they all kept reaching out (a white ring meant a ride), And so, of course, the prize to win each jolly rider tried. It happened the carousel man was short of cash that day, And so to make them pay again he hid the ring away. The pig in rooting round the sand upon the white ring came, Which won for it the promised ride and caused that man much shame.

Joliet Strike Is Settled.

Joliet, Ill., July 30.—The strike at the Pressed Steel Car works inaugurated two weeks ago has been amicably settled. The 200 men return to work on a piece scale. They formerly received day wages, and the new arrangement will give them a slight increase. During the strike the entire plant has been closed.

Absolute Zero.

Absolute zero is the point at which, as has been determined from experiments with gases, matter would be without a trace of heat—could be cooler no farther. This point is 273 degrees below centigrade zero. A degree of cold so intense as this is, however, absolutely unobtainable.

RINGLING BROS' SHOW AND PARADE

LARGEST CROWD FOR THIS YEAR GATHERED IN THE CITY.

Magnificent Herd of Elephants Were of Special Interest to the Throng That Packed the Streets—Show Given is Better Than Ever—Another Exhibition Tonight.

July 30th has arrived and with it Ringling Brothers World's Greatest Shows.

At an early hour this morning people from the country began to flock into the city, to be sure and be on hand to see all of the parade. At eight o'clock there were as many people on the street as at any time during the Buffalo Bill show. They came in all sorts of vehicles, by rail and on foot. Old men and women, young men and their best girls, and small children, all helped to swell the crowd which by noon filled the streets to overflowing, and made travel on the sidewalks difficult. It was a well behaved and good natured crowd, all bent on getting their money's worth and having a good time.

Police Out in Force. Chief Hogan and a force of special police, with the sheriff and his deputies were kept busy keeping the crowd out of harm's way and watching for "dippers" who always follow in the wake of aggregations of this character and work the crowds.

On every corner and in the side streets, games of chance and places where "everybody" hit the baby you get a fine cigar" were in operation. Men with cane racks also secured prominent stands where a lucky throw won a fine cane for five cents.

The hotels and restaurants were taxed to their fullest capacity in feeding the hungry multitude. The owners of the soda fountains had extra forces at work and were kept busy handling glasses of refreshing drinks. Many people got up early this morning and made their way to the depots to see the circus unloaded. Those who got there at four or five o'clock as many did, had a long wait for the first train did not arrive until nearly seven o'clock. The last wagon did not reach the show grounds until nearly ten o'clock.

Elephants on the Bridge. Yesterday there was considerable doubt in the minds of the authorities as to the advisability of allowing as heavy wagons and elephants to cross any but the Monterey bridge. The circus men were willing to take chances on the strength of Milwaukee and Court street bridges, so were allowed to use them and had no trouble.

Twenty-five elephants on Milwaukee street bridge at one time showed that the structure was still safe and able to carry a much heavier weight without danger. It was nearly noon when the procession put in an appearance coming up South Main street. The line of march was up Main to Court, west on Court street across the bridge to Pleasant, up Pleasant to High, north on High to Milwaukee, east on Milwaukee to Main, north on Main to Prospect avenue, up Prospect avenue to Bluff, south on Bluff to Milwaukee, down Milwaukee to Main and then to the show grounds in Spring Brook.

Finest Parade Ever Seen Here. It is putting it very mildly to say that it was the finest parade ever seen on the streets of this city, of course excepting the parade made by the "Nonesuch Bros." show one year ago last Fourth of July.

First of all rode one of the celebrated brothers who are proprietors of the great show. Then came the tableau wagons with their brilliant colorings, drawn by magnificent horses in handsome harnesses. There were the open dens of state, wild with apparent carelessness, but real with apparent carelessness, but real alertness among them to the admiration of the crowd. Inspiring music was furnished by the best of bands both in band wagons and on horse back and the hit of the parade was the mounted cavalry and the cavalry band.

Band Were Applauded. They were loudly applauded by the spectators on both sides of the street and the clown band was also a feature, as was the oriental band that preceded the squad of camels with their ungainly walk and uniquely dressed riders. The clumsy but always enchanting elephants, twenty-five in number, the finely formed and gaily caparisoned horses, the lady and gentlemen riders with their attractive costumes, the children's menagerie, the steam calliope and the chime of bells made up a scene of grandeur that was only a forerunner to the sights to be seen at the grounds where the multitude was treated to an exhibition of the most wonderful and startling feats.

Under the Great Canvas. Under the great canvas this afternoon thousands of people found more to be seen than one pair of eyes could possibly take in. A series of great acrobatic acts such as never before seen here keeps the wonder and admiration of the spectators at fever heat and the daring feats which followed each other in quick succession even happened at the same time with others make good the claim of the Ringlings that they give their patrons the best show that a lavish expenditure of money can secure.

The aerial work of the Holloway trio is a thrilling novelty and their work is in comparable and Miss Amelia Feeley's horse back riding was also one of the favorite features. The work of the trained elephants and horses seemed more remarkable than ever and the entire performance was strictly up to date, greatly improved and well worth the money.

Ringling Brothers are very jealous of their fair reputation and guard it carefully. All of the latest appliances have been installed by these enterprising showmen. Toilet rooms for ladies and for gentlemen are innovations in the circus business and

are but one of the numerous features which show the thoroughness of the management.

There will be another performance tonight at 8 o'clock when another immense audience will be delighted.

How to Cure Ivy Poison

The attention of the public recently has been attracted to the numerous cases of ivy poison which have developed from contact with the vine in the parks and other wild spots in and about Chicago. So alarming has been the increase that the Health department has taken steps to fight the evil.

In view of this agitation a letter relating to the prevention and cure of ivy poisoning, written by Mrs. Margaret Hutchins Phister, mother of Walter B. Phister, 4739 Kenwood avenue, is timely. Mrs. Phister lives in Maysville, Ky., but is now visiting relatives in Chicago.

"Persons who come upon any kind of ivy or similar vine in parks and woods," says Mrs. Phister, "should remember that the poison ivy variety is three-leaved, while the five-leaved kind, so generally cultivated, is perfectly harmless."

"If you come in contact with the poison ivy you will feel as if a wasp had stung you. On the spot touched by the vine a tiny blister will be found, which, if pressed, will discharge a secretion as colorless as a drop of water. This fluid spreads the inflammation, as do also the finger nails, if you scratch the irritated spot. The sufferer generally jerks his head away from the heat in a few days the rash has spread considerably."

"To cure the inflammation wrap the irritated spot in cotton bandages saturated with lard. The hands should be bound in the same manner to prevent scratching the wound and spreading the poison. These bandages resaturated with lard should be renewed every day. As soon as they are applied they have a soothing effect and a permanent cure will be effected in a short time."—Tribune.

LINE TO MADISON A CERTAIN PROJECT

New Power House Being Erected at Capital City is Significant of a Greater Purpose.

Yesterday morning at Madison work was commenced on a new power house which is primarily supposed to be for supplying of the electrical current for the Madison Street Railway Company, but which is considered by Madison business men to be proof that the Madison-Janesville trolley line is a substantial project which is to materialize in the near future.

The plant will be a five hundred horse power one and its estimated cost is \$20,000. The decision to build it has been very sudden and it will be pushed to completion with a rush. It is expected that it will stand complete on the shores of the Catfish at the foot of Williamson street in the Sixth ward by the first of September.

The plant is to be erected by Philip L. Spooner and is a preliminary step to the construction of Mr. Spooner's dam across the Wisconsin river at Kilbourn and to the trolley line between this city and Madison. Hitherto the Madison street railway company has drawn its power from the Madison Gas and Electrical company, situated just beyond the Northwestern depot on Lake Monona. The five year contract to supply the trolley line with its current expires next September. Mr. Spooner wanted to renew the contract for a shorter period of time but the Gas and Electrical company would not make terms for less than a period of five years.

In the very near future Mr. Spooner expects to have his dam across the Wisconsin river at Kilbourn completed and when that is done he will draw the power for the street cars from there. Rather than make a five year contract with the power company, Mr. Spooner decided to build his independent power house a little earlier than he had intended and to use the electric power temporarily. Engines and dynamos are already on their way to Madison and Mr. Spooner has made arrangements with the electrical house of which he purchased them to buy them back when he is through with the machinery.

It can readily be seen that Mr. Spooner would not go to the expense of building a temporary power house rather than renew a five year contract unless the big Kilbourn power dam and the Janesville trolley line were certainties of the immediate future.

CONDITION OF CROPS

Three Tobacco Counties Reporting to Secretary True, Show: Dane 25, Crawford 40, Vernon 60.

Madison, Wis., July 30.—[Special]—Secretary True of the state board of agriculture has already received reports from ten counties as to the condition of the crops, in response to his request sent out throughout the state for reports of conditions on August 1. Three or four of the southern counties have reported, and all show the effects of the drought except in Iowa, where an average condition is reported. Crawford, Dane and Walworth all report oats at 60, with 100 representing an average, and corn at 40 to 50. Three tobacco counties reporting show: Dane 25, Crawford 40, Vernon 50. Marathon county, in the northern part of the state, reports all crops above the average except potatoes, which are put at 95. Chippewa reports an average for everything except wheat and potatoes, 90 each.

A report based on these figures will be issued by Mr. True as soon as they are all in, giving an estimate of the loss caused by the drought. In making this report Mr. True will divide the state into three districts, putting the three southern tiers of counties, where the drought has been the most severe, in one district, the central part in the second and the northern counties which have had plenty of rain in the third.

HARMONY

Harmony, July 30.—The rain of Sunday evening did a great deal of good, and people feel much better in consequence.

QUICK CHANGES NOT ON PROGRAM

Miss Lulu Hastings, a Milwaukee Actress, Plays Black and White in Two Different Theatres.

There were some lightning changes not down on the program at Manager Thanhouer's two theaters last night and two audiences were in blissful ignorance of the fact that one actress was indulging in breakneck drives between the Academy and the Davidson, changing costumes and make-up on the way, in order to appear in parts at both these playhouses says the Milwaukee Free Press.

And Miss Grace Mae Lamkin was the cause of it all. Not that she was at all to blame, for to come down with the quinsy shortly after Saturday night's performance can hardly be looked upon as a circumstance to be willfully brought about. Languishing in one's chamber, with the neck, which should have dazzled in the part of Fifi Oranski, painted to resemble the epidermis of an orange, is not the kind of a lay-off that Miss Lamkin would be likely to improvise.

When Manager Thanhouer learned the truth early this morning he did some quick thinking. The leading part in "All the comforts of a Home" was vacant, and there was no one to fill it. Still the play must go on as the house was nearly sold out. But Mr. Thanhouer is a man of resources, and he does not say "die," easily.

Miss Hastings Plays Two Parts. A council of war was called, and after inspecting the ranks of "the faithful" it was remembered that Miss Lulu Hastings, who is playing the colored mammy in "A Southern Romance" had played the part of Emily Pettibone once before. In less time than it takes the telling Miss Cora Armin, who had been taking this part, was assigned the one vacated by Miss Lamkin, while Miss Hastings was duly installed as Emily Pettibone.

The question which now confronted the management was still more serious; could Miss Hastings, on one and the same evening play the dark mammy at one theater and the sweet, trusting Emily at the other? That even this was accomplished the audiences of last evening will bear witness.

Makes Up in a Carriage. This was the "modus vivendi." The Academy curtain was rung up fully fifteen minutes earlier, and Miss Hastings tripped on the stage as Emily. A closed carriage was standing at the stage door and Press Agent Ruddle held the telephone line between the Academy and the Davidson. In the meantime the curtain at the latter theater was held. At the moment Miss Hastings stepped off the stage Mr. Ruddle telephoned the word to Mr. Thanhouer, and "A Southern Romance" was soon under way. By this time the actress was already in the carriage changing her costume with one hand, and spreading layers of burnt cork on her face with the other, as the horses tore down the street. A few minutes later she rushed in at the stage door of the Davidson, took a hasty glance in the mirror, and the next moment saw her shuffling on the stage in true darky fashion, having caught her cue just in the nick of time.

This transformation had to take place three times in the course of the evening, the intermission at the Academy to give the plucky actress a little leeway to remove the black paint when she re-assumed the character of the white maiden. Altogether it was a very remarkable performance, which reflects the greatest credit on the Thanhouer management in general, and one actress in particular.

Jack Bacon, the ex-dramatic critic of the Sentinel, and vice-consul to be at Hong Kong, and Miss Hastings' sister accompanied the actress on her lightning trips.

A MEMORY OF THE SUMMER OF 1816

The Danville, (Ill.) News, with a thoughtfulness that cannot be too highly commended, recalls the memory of the summer of 1816 to its old subscribers, and gives some interesting facts concerning the meteorological conditions which then prevailed in these parts.

If the recollections of the News are not at fault, and it seems to think they are not, the summer can not, strictly speaking, be said to have ever set in. Along in April, when the gardens should have been exhibiting signs of active life, the snow on the ground was from four to six feet deep, and frozen solid for half its depth. In May only the surface of it had melted, and the ground could not be reached for planting purposes except by tunneling. In June the snow had disappeared, but the ground was still frozen hard, and along toward the latter part of that month another fall occurred, which made sleighing good in Danville and vicinity for several days.

On the morning of July 4th water froze in the wells and pitchers of the early settlers, and there was excellent skating on the neighboring ponds. Snow fell toward noon and the usual Independence day exercises were held in a church warmed by blazing log fires, and were participated in by men and women in mid-winter clothing.

The spring, when it came in reality, was so short and severe that no vegetation could thrive in it. In August, the corn, which had struggled against adverse circumstances, went to tassel so early that it was useless except as fodder. Corn from other parts of the country brought unheard of prices, and for seed to be used in the spring of 1817 farmers were obliged to provide themselves with corn grown in 1815. All bread-stuffs went up and flour a year afterwards sold at \$17 a barrel.

As a matter of fact, there was no

summer in the vicinity of Danville in 1816, and the files of the Danville News for that period prove that the weather experts in those days attributed the extraordinary meteorological conditions to spots on the sun, just as they are doing now.

The winters preceding and following the severe summer were intensely cold, and, as the people of those days knew none of the conveniences of steam heated flats and were wholly ignorant of the comforts derived from contact with the modern janitor, their suffering, it will be supposed, must of necessity have been intense.

The contrary was the case however. The public health was never better. There were the usual quillings and log raisings everywhere. Although the crops were a failure, the spirits of the people never drooped, and their confidence in Illinois as a corn producer never weakened. The sturdy pioneers and first settlers went about their business, just as usual, during that hard season, and were cheered now and then by learning that Chicago was already beginning to attract attention as a summer resort.—Inter Ocean.

Heartburn.

When the quantity of food taken is too large or the quality too rich, heartburn is likely to follow, and especially so if the constitution has been weakened by constipation. Eat slowly and not too freely of easily digested food. Masticate the food thoroughly. Let six hours elapse between meals and when you feel a fullness and weight in the region of the stomach after eating, indicating that you have eaten too much, take one of Chamberlain's Stomach and Liver Tablets and the heartburn may be avoided. DOWIE AT RAINMAKING.

"Healer" Takes All the Credit for Recent Showers.

Chicago, July 30.—Dowie has entered claim for the credit of producing the showers which have fallen over the drought stricken districts of the country of late.

"Deacon" O. L. Sprecher is acting as Dowie's press agent. In a long notice of the "general overseer's" rainmaking qualities in the Leaves of Healing, the article is prefaced as follows:

Elijah was a man of like passions with us. And he prayed fervently that it might not rain.

And it rained not on earth for three years and six months.

And he prayed again.

And the heavens gave rain and the earth brought forth her fruit.

"It is very striking," says "Deacon" Sprecher in the article, "that one of the first manifestations of the approval of our Father in heaven upon our general overseer's declarations and claims is that his prayers should be answered like Elijah's of old, and that the rain should come to the dry and thirsty land in many localities."

Dowie is now in his summer home, Ben McDahl, in Michigan. Yesterday afternoon the services at the tabernacle on Michigan avenue were conducted by "Overseer" Sprecher, who indulged in a tirade that was a weak copy of his superior. He attacked the Catholic and Protestant churches, the secret societies and the professions.

EDMUNDS MYSTERY SOLVED.

Girl Who Disappeared Nine Years Ago Returns to Her Father.

Wilkesbarre, Pa., July 30.—George T. Edmunds of Plymouth has found his daughter, Sadie, who, nine years ago, when she was eighteen years old, disappeared from her home in Alpena, Mich. It was thought she had been drowned or murdered by a jealous lover. Two weeks after her disappearance her mother died from grief. One month later her sweetheart died from the same cause. Her father was so affected that he left town and moved to Plymouth. There he started in business anew, but brooded over the mystery. Two weeks ago the daughter, while at Thousand Islands, read in a Wilkesbarre paper of an accident to a man of her father's name. She employed a detective, who investigated and acquainted the father of the daughter's whereabouts. A happy visit followed. The daughter at the time of her disappearance married a man now living in New Orleans, La. She is Mrs. Lawrence Brice.

Silence on Schley Controversy.

Washington, July 30.—Secretary Long has issued the following general order: "All persons in the naval service are strictly enjoined to refrain from any public statement regarding the subject matter of the court of inquiry requested by Rear Admiral W. S. Schley."

THE OBITUARY RECORD.

Aged Preacher Is Dead.

Chicago, July 30.—After almost a century of life which was given to ministerial and scientific work, Dr. Adam Miller, the preacher-physician, is dead at his residence, 172 Ashland boulevard. He was 91 years of age. Dr. Miller was one of the foundation stones of the German Methodist church in America, being one of the arduous workers who way back in the 30's started that branch of the church which has such a powerful following today. But his success in the church was even eclipsed by his achievements in the world of medicine. During the stirring war times of 1861 Dr. Miller was the family physician of War Governor Yates, father of the present governor. The doctor also had the honor of saving the life of young Yates and preserving him for the governorship of the state. When other physicians had given up little Richard Dr. Miller sat by his bedside all night and brought him around from an illness which it was feared would cost him his life.

Dr. Milo B. Ward Dead.

Kansas City, Mo., July 30.—Dr. Milo B. Ward, aged 50 years, died here yesterday. During the Spanish war he was appointed to the volunteer army by President McKinley, being commissioned a major surgeon and assigned to duty at Chickamauga. He was past grand master of the Independent Order of Odd Fellows of Kansas and also past chancellor of the Knights of Pythias.

Negroes Kill White Men.

Camden, Ark., July 30.—News has reached here from Leake township, Nevada county, that a party of white men sent word to Lige Seigler, a negro, that they would attempt to whip him last night and received word back that some of them would get killed if they came. The party went out, and the report is that Seigler and his men shot into them, killing Lewis Haynie, brother of State Senator Haynie, and Hop Halton, a brother of John Halton, a prominent merchant at Stephens. There are some 400 negroes and thirty white people in this township and race troubles have been brewing for some time. At last reports parties of white people had left for the scene of the trouble from Waldo and Stephens, and the negro's house was still surrounded.

Handling Freight in Russia.

Early in April there were lying at the stations of three Russian railroads waiting to be forwarded, 27,000 carloads of grain, equal to about 12,000,000 bushels, much of which has been waiting for months. Complaints that railroads are not able to handle their traffic are common in Russia.
